

Exceptional Kids

June 2011

Evolution is defined as a process or growth and is something in which our society continues to participate in this 21st century of technology. It is, therefore, only natural that this newsletter evolves too. The information you have been receiving here, and more, will now become instantly available to you as I discover it. So please come and join me on the **Exceptional Kids** Facebook page.

An 'Exceptional' Quote

"Life consists not simply in what heredity and environment do to us but in what we make out of what they do to us."

Harry Emerson Fosdick

'Exceptional' Finds

Timely, relevant news articles for kids.
